AZ-500 (SC-*)

Azure Solution Architects have subject matter expertise in designing cloud and hybrid solutions that include compute, networking, storage, application services, data solutions, monitoring and security.

Working knowledge of networking technologies including connectivity services, application delivery services, and network architectures.

AKS

ACI

Working knowledge of compute technologies including virtual machines, containers, and PaaS compute solutions.

Working knowledge of storage technologies including relational and non-relational data solutions.

Cosmos-DB

Experience architecting solutions including security, migration, and business continuity.

Learning Path

AZ-305 Agenda

Module 01 Design a governance solution

Module 02 Design a compute solution

Module 03 Design a non-relational data storage solution

Module 04 Design a data storage solution for relational data

Module 05 Design a data integration solution

Module 06 Design an application architecture solution

Module 07 Design Authentication and Authorization Solutions

Module 08 Design a solution to log and monitor Azure resources

Module 09 Design a network infrastructure solution

Module 10 Design a business continuity solution

Module 11 Design a migration solution

Course AZ-305T00: Designing Microsoft Azure Infrastructure Solutions

Collection • Edited on 1/14/2022 • Created by Microsoft

[Delete](#) [Share](#)

This course teaches Azure Solution Architects how to design infrastructure solutions. Course topics cover governance, compute, application architecture, storage, data integration, authentication, networks, business continuity, and migrations. The course combines lecture with case studies to demonstrate basic architect design principles.

Items in this collection

Design governance and compute solutions

In this module you will learn about governance and compute solutions.

MODULE

Design governance

33 min

★★★★★ 4.9 (162)

MODULE

Design a compute solution

33 min

★★★★★ 4.8 (33)

Case studies

- Tailwind Traders is modernizing its infrastructure and moving to the cloud
- You have been asked to recommend and suggest new cloud architectures - requirements and tasks are provided in case studies
- Make sure to actively participate in small groups or individually
- Become familiar with the [Azure Architecture Center](#), [Azure Charts](#), and the [Azure Documentation](#).
- Consider the Cloud Adoption Framework and Well Architected Framework as you design your case study solutions (next slides)
- Optional hands-on sandboxes are provided on Learn

End of presentation
